

# Full Stack Development Project Documentation

## 1. Introduction

Project Title: ShopSmart: Your Digital Grocery Store Experience

Team Members: [Add your names and roles here]

## 2. Project Overview

Purpose: Our app provides a seamless online shopping experience for customers, allowing them to explore and purchase a wide range of products.

## 3. Architecture

Frontend: Angular

Backend: Node.js + Express.js

Database: MongoDB

## 4. Setup Instructions

- Node.js and npm
- MongoDB
- Express.js
- Angular CLI
- HTML, CSS, JavaScript
- Database Connectivity via Mongoose
- Version Control with Git
- IDE (VS Code, Sublime, WebStorm)

Clone repo, install dependencies, set up environment variables, and start frontend/backend servers.

# Full Stack Development Project Documentation

## 5. Folder Structure

Client: [Describe Angular folder structure]

Server: [Describe Node.js folder structure]

## 6. Running the Application

Frontend Command: npm start

Backend Command: npm run dev

## 7. API Documentation

- POST /api/register Register a new user
- GET /api/products Get all products
- POST /api/cart/add Add product to cart
- DELETE /api/cart/remove/:id Remove item from cart

## 8. Authentication

JWT tokens used for session management

Passwords hashed using bcrypt

Middleware protects private routes

## 9. User Interface

- Homepage with product listings
- Navbar (login/register/cart)
- Product details page
- Admin dashboard

(Screenshots can be added here)

## 10. Testing

API testing via Postman

Manual UI testing

(Optional: Unit tests with Jasmine/Karma for Angular)

## 11. Screenshots or Demo

[Insert screenshots or demo link here]

## 12. Known Issues

- Admin page crashes on empty product list
- UI not fully mobile responsive

## 13. Future Enhancements

- Payment gateway integration
- Product reviews/ratings
- Order history
- Email notifications
